

UNITED SAFETY
& SURVIVABILITY CORPORATION™

INTRODUCING INFINITY WAVE

The Lightest Seat of its Kind

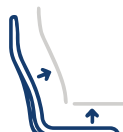

Lightest seat available with stainless steel, providing an approximate 25% weight savings *

Significant weight reduction allows for increased range and reduced charge times, emissions, and fuel consumption

Modern design combines durable stainless steel and lightweight plastic elements

As little as 30 seconds for insert installations and removals

Reduce fabric wear, consumption, and customer servicing using unique front cushion insert

Customize bus interior designs with distinct color, component, and configuration options

Knowledgeable Field Service Technicians cover all markets throughout North America

Ability to match all bus layouts with varied configuration options

*When compared to other stainless offerings of similar configurations

THE NEXT GENERATION OF PASSENGER SEATING
