

# Your VidFleet Solution for Fleet Management

*Smart Video Monitoring is a Smart Business Decision*

 GPSTrackit

# Are driver concerns distracting you from **growing your business?**

*VidFleet is the answer.*

## Prevention

Video AI predicts & prevents accidents. In-cab coaching reduces risky driver behavior.

---

## Protection

Protect your drivers and protect your fleet from liability & false claims. Get the proof you need with video evidence you need in seconds.

---

## Performance

Improves driver behavior and productivity to deliver cost savings through safer and better driving.

# More Than Exoneration

## Accident Prevention

### Feature Benefit

✔ Event Detection	> Automatically identifies risky driver behavior and coaching opportunities
✔ In the moment in-cabin audible alerts	> Instantly coach drivers for better behavioral outcomes
✔ Broad set of harsh driving event triggers	> Customized event reporting to fit your fleet's needs
✔ Robust driver behavior scoring	> Recognize & reward positive driving motivate drivers to improve vs. peers
✔ Real-time alerts, reports and insights	> Immediate event notification (email, text) Extensive set of actionable reports

# GPS Trackit

## Edge Processing

### 1. Real-Time AI:

Identifies conditions – 30x per second

### 2. Edge Coaching:

Camera notifies driver in the moment

## Edge Processing

- Real-time decisions made in-vehicle
- Data samples taken 30x every second which uses all available video

## Alternative Cloud Processing

Camera only looks at gyroscope and accelerometer for harsh impact events

Video clip sent back and forth over air to cloud server for AI interpretation

Driver notified of identified unsafe events through “impact” related triggers along with AI cloud determination

## Cloud Processing

**Slower:** Latency while video sent to cloud for determination to be made

**Limited:** Decisions on gyroscope or accelerometer (speed-triggered) only capture 10% of events... 90% missed

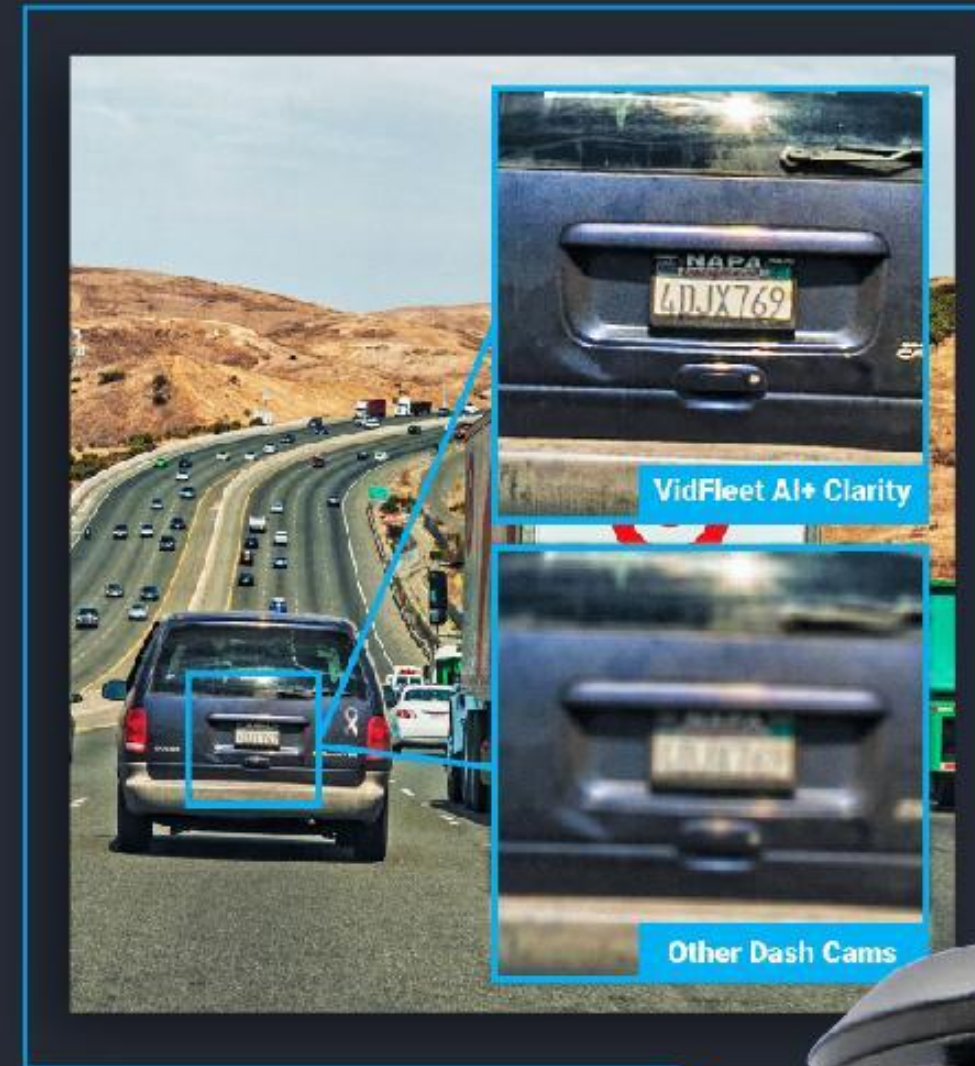

Capture What Really  
Matters With VidFleet

Industry's  
Clearest Picture

High Resolution Streaming  
Over Platform

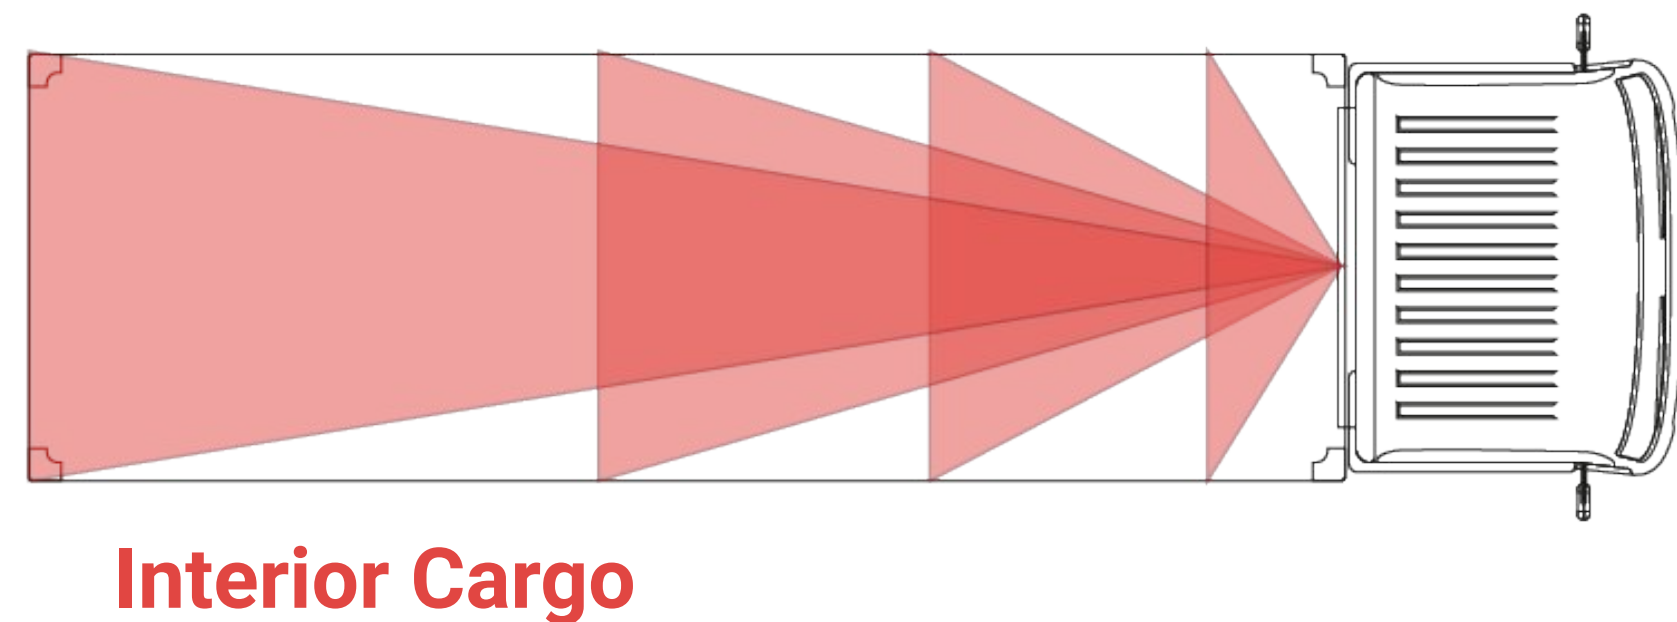

# The Difference Is Clear

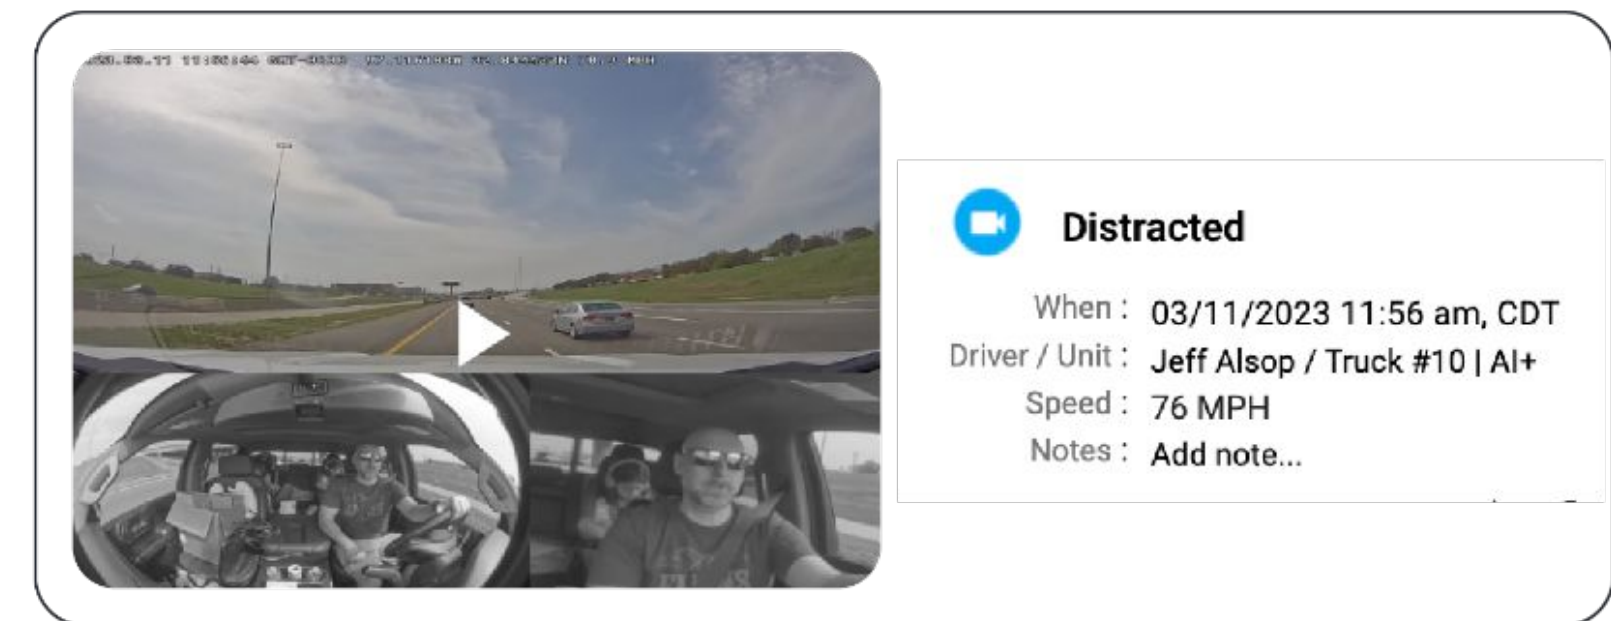

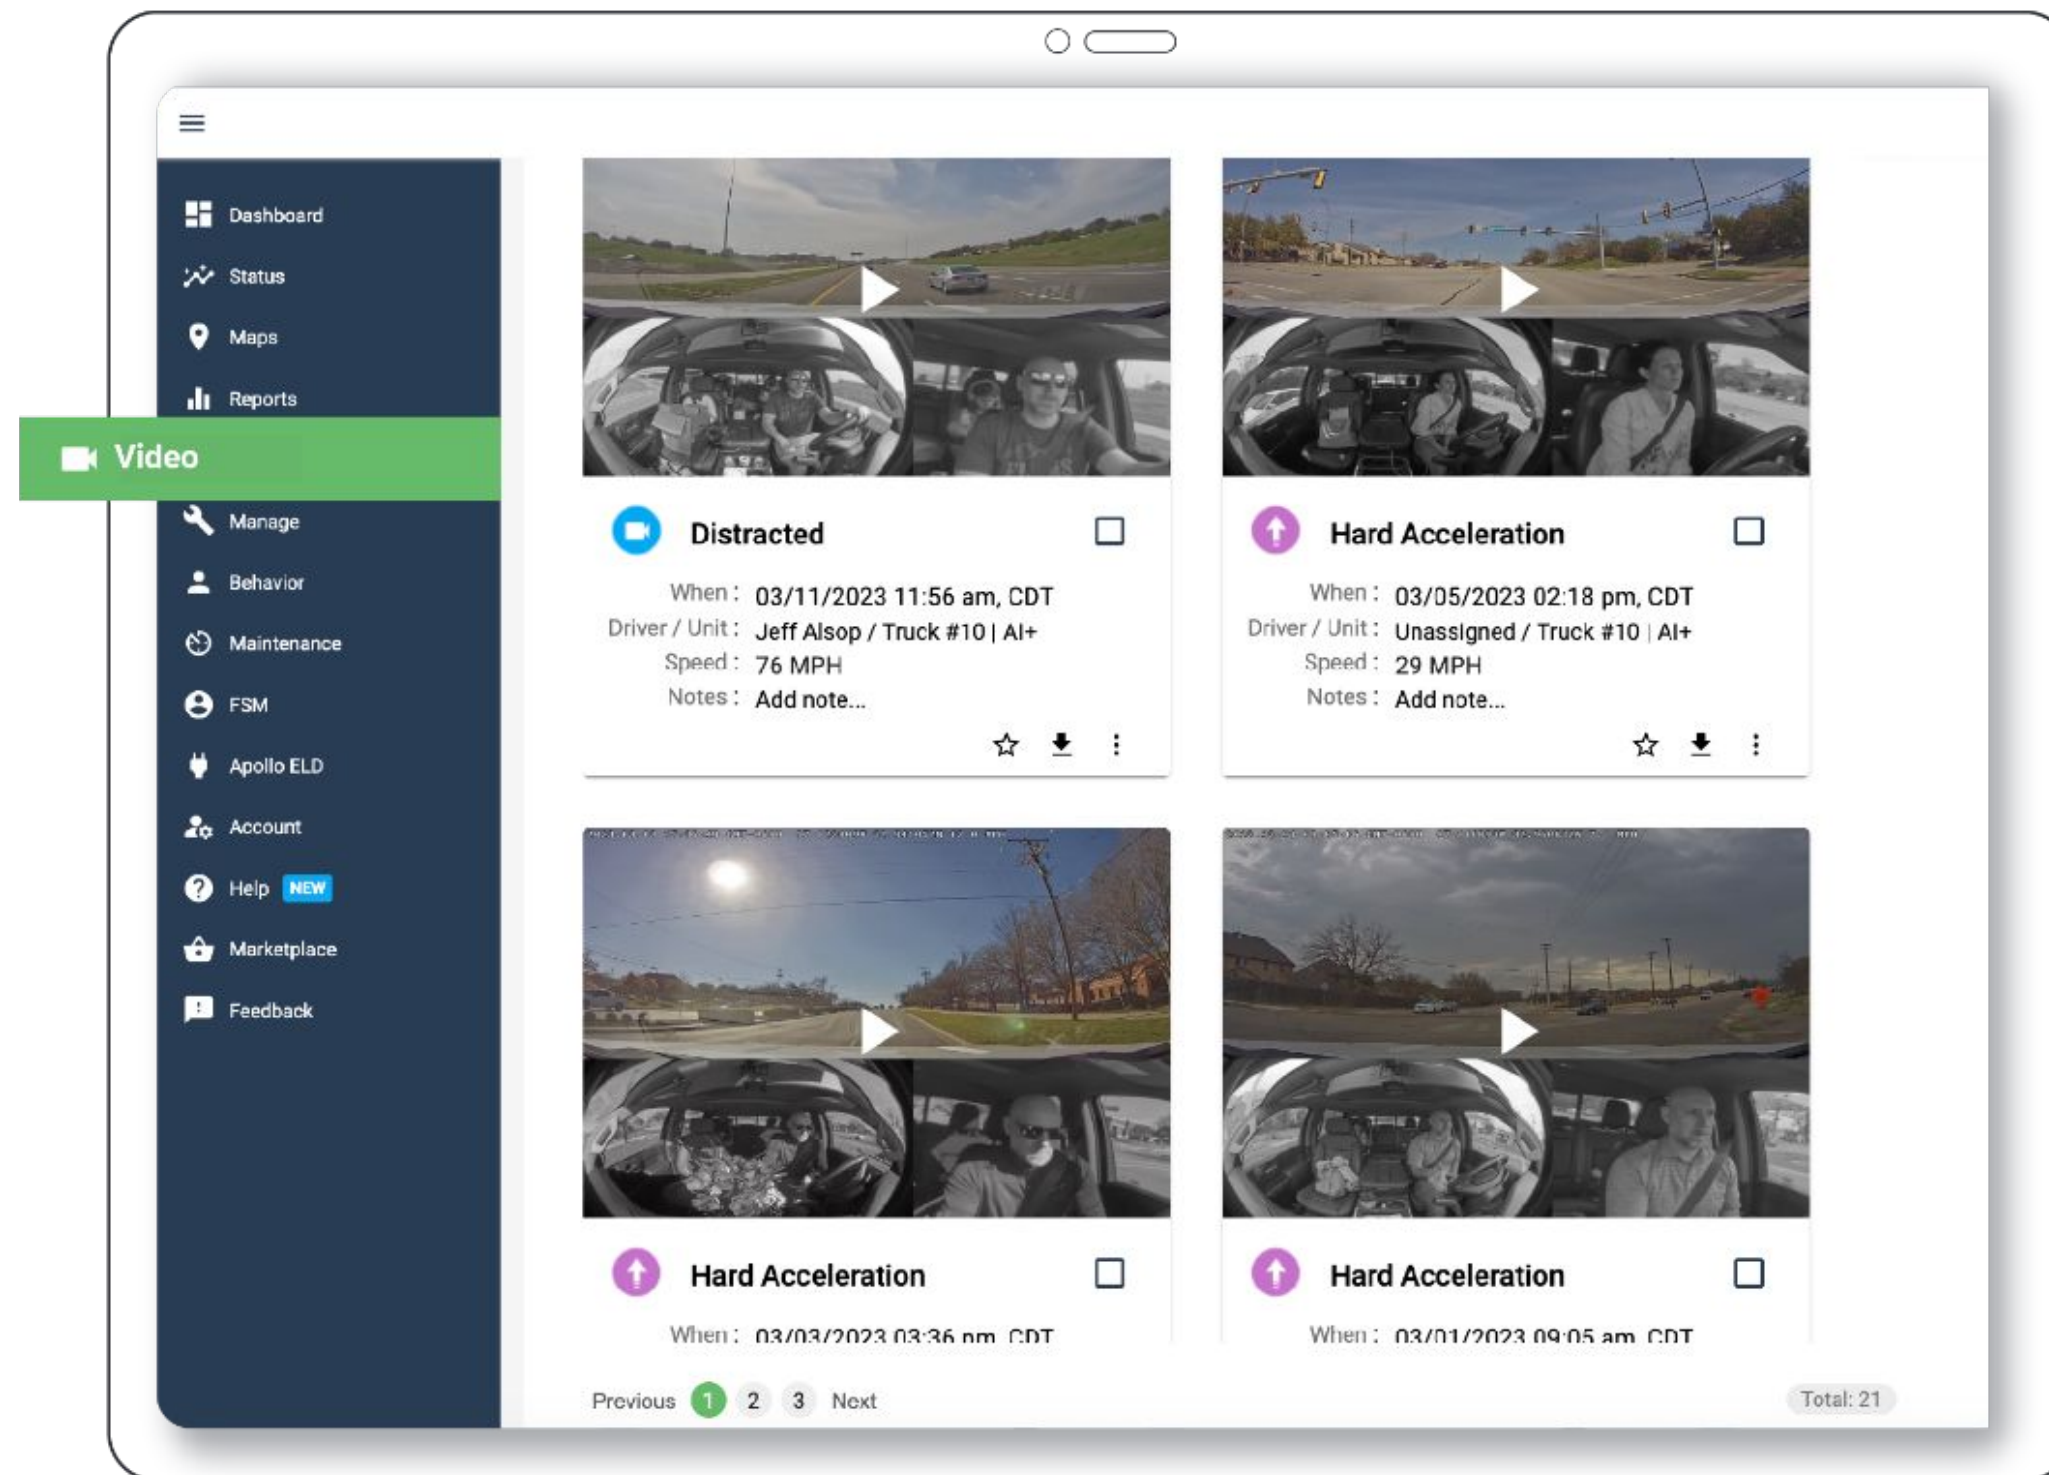

# Aux Camera

## Applications of Aux Camera

# “Video Proof” At Your Fingertips

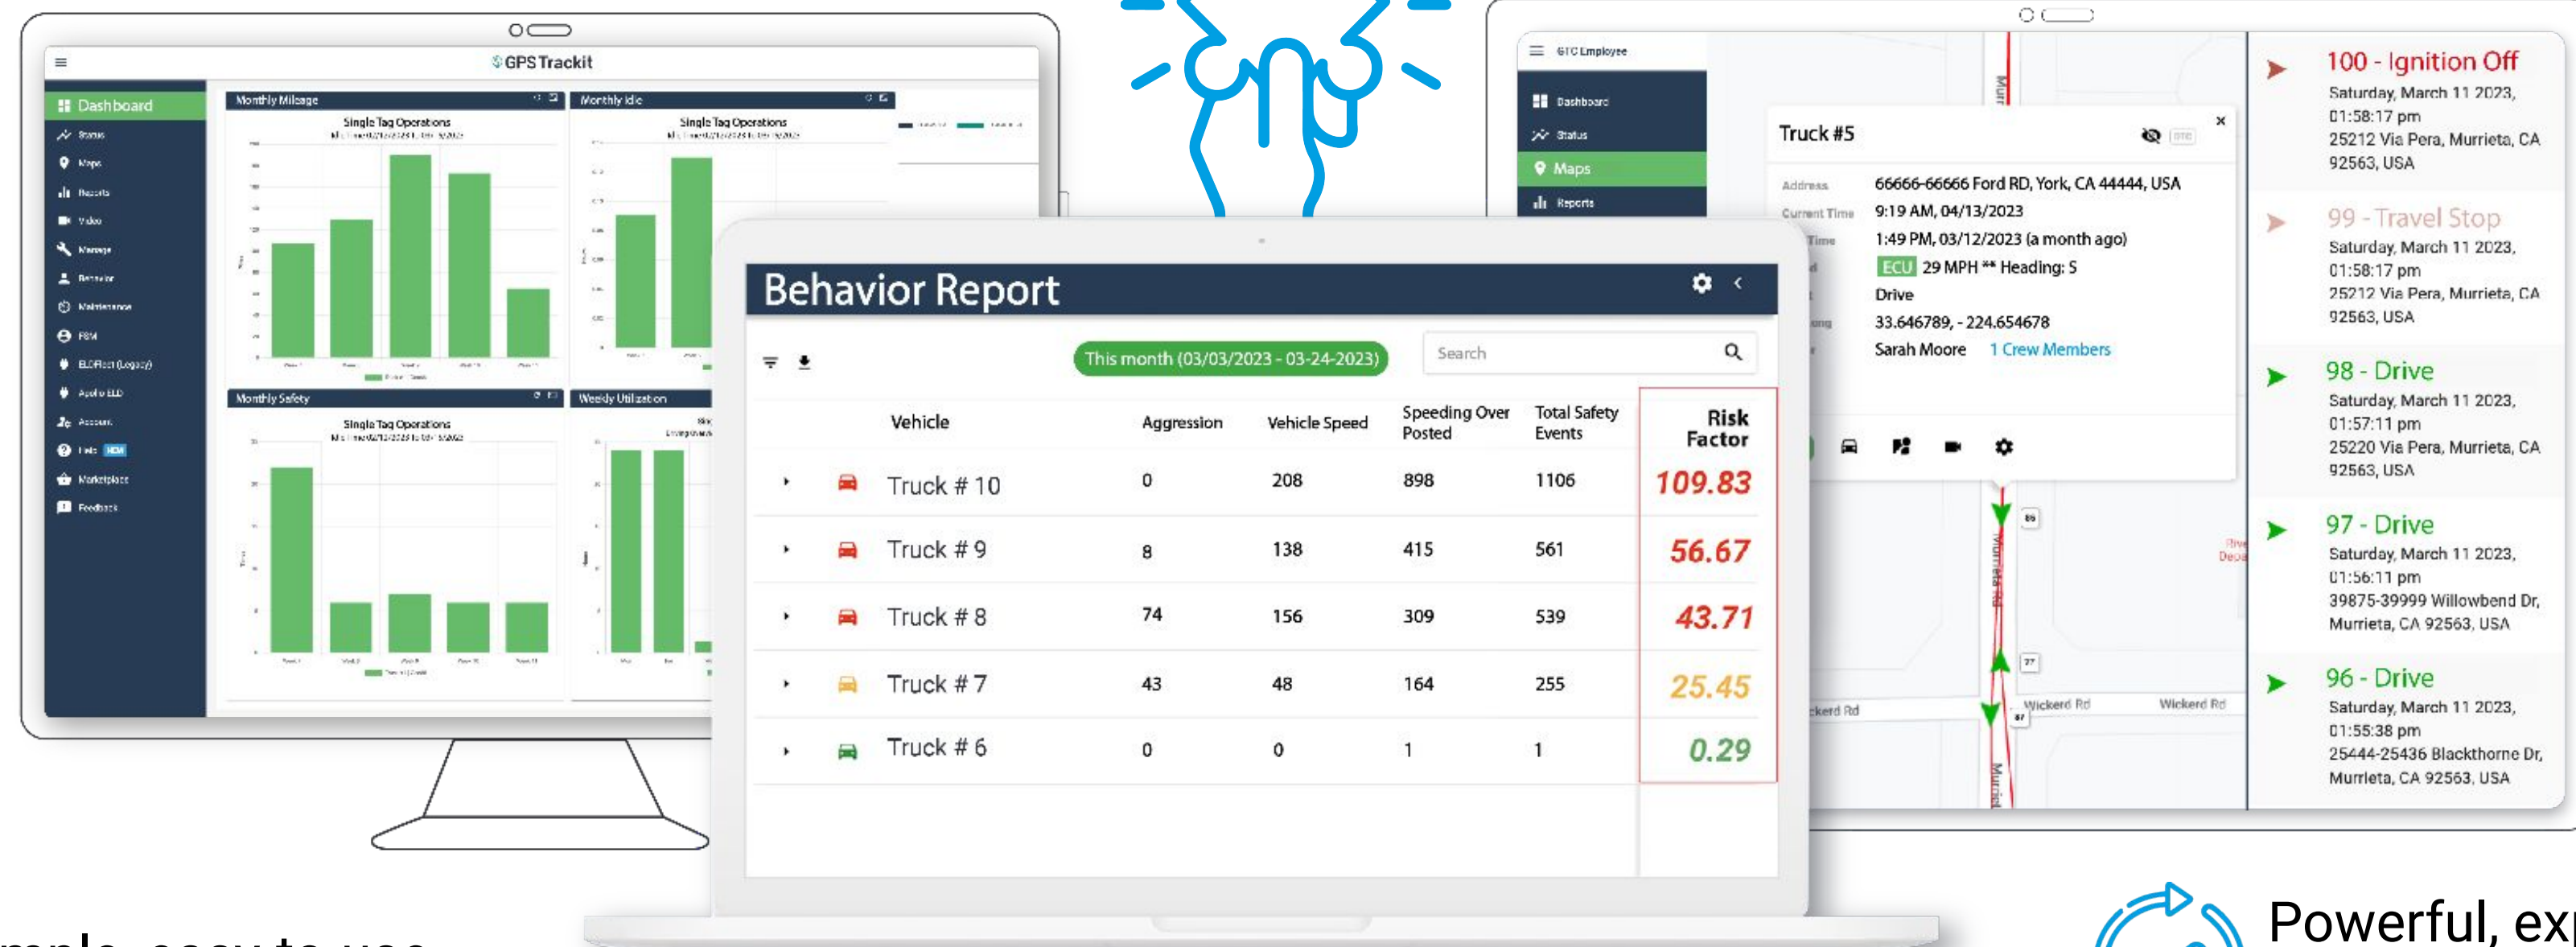

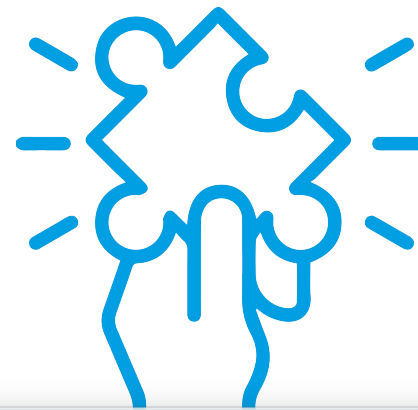

- Immediately find video or important events
- Events captured before, during and after an incident
- Capture needed evidence to exonerate or settle claims... quickly and effectively

*Safer driving protects your business, and with video proof, you can defend against costly disputes and fraudulent claims.*

# Simple All-In-One Solution

 Simple, easy-to-use interface

 Single platform for fleet, field and video management + performance data, and more

 Flexible to meet changing & growing needs

 Powerful, expandable features

# Fleet Intelligence Simplified

Our passion is helping companies improve their bottom-line results by making software and data central to their business strategy.
