

# Why Spradling!

## Production

60 years in business

Dual source manufacturing in the Americas (Costa Rica and Colombia)

Cut & Sew in Costa Rica

Invested \$32M in new Costa Rica production facility

Vertically integrated (knit our own textiles)

## Sustainability

Behind every Spradling product, there is a higher purpose. Our design goes beyond improving spaces and satisfying the most demanding requirements. We are motivated by a commitment to the future, to have a positive impact on the environment and to improve the lives of the people and communities around us.

### 2022 Achievements

- 218 MWh of renewable energy generated by 678 solar panels
- 2.55% less kWh used per each meter of coated fabric
- 8.7% reduction in our GHG emissions through efficiencies.
- Nearly 100% of the energy in our Costa Rica plant comes from renewable sources.
