

Penta Corporation's premier control suite **WavWriter™** provides the accurate creation, efficient distribution, and effective control of the ADA compliant voice and visual messaging over modern data networks for the world's greatest transportation systems.

The WavWriter system uses an intuitive map-based user interface that allows for the delivery of live, Ad Hoc, pre-recorded, automated, and text-to-speech audio and visual messages that can be delivered to any station or zone.

With a proven track record for keeping passengers informed and on course while using the subways, commuter rails, light rails, buses, and trolley, Penta's WavWriter can deliver timely and effective information to audio systems, LED displays, video displays, personal communication devices, and smart phones.

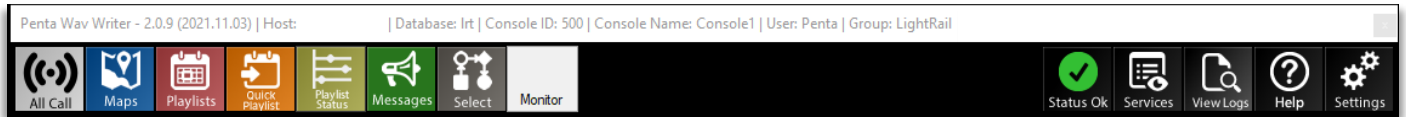

By delivering accurate information to visual displays and public address systems through IP communications, Penta can easily meet the needs of your transit authority.

Key Features:

- ◆ ADA Compliant
- ◆ Custom Display Colors, Logos, and Branding
- ◆ Live Announcements, Pre-Recorded, and Text-to-Speech
- ◆ Redundant Servers with Automatic Failover
- ◆ Multilingual
- ◆ Supports Arrival, Departure, Customer Service, and Emergency Messaging

The **WavWriter Toolbar** is a graphical interface control module used to launch operation functions of the WavWriter Public Address and Visual Messaging control suite. It can be docked on any side of the desktop screen and its location will be saved for subsequent launches of the software. Toolbar buttons can be toggled on and off based on configurable permissions of the user currently logged in.

ALL CALL
Selects every location into system for live announcements.

MAP
Displays a map of each location in the system and allows users to select announcement locations.

PLAYLIST
Enable or disable messages to run with configurable parameters.

QUICK PLAYLIST
Activate message playlists with read-only presets.

PLAYLIST STATUS
See a summary of messages that are currently playing and recently played messages.

MESSAGES
View, add, edit, delete messages to be used in playlists.

SELECT
Select zones for ad-hoc and live messages.

MONITOR
Monitor audio currently playing at a given location.

STATUS

View and address system alarms.

SERVICES

Opens System Services configuration for primary and backup servers.
