Oil Change
Possible With
Femco's Click
Drain System!"**

Why use Femco oil drain plugs?

Faster

Oil can be drained hot (engine temperature). Hot oil is more viscous. This results in a faster drain time and ensures maximum waste is expelled when the dirty oil is drained.

Safer

Due to the closed system, Femco plugs eliminate all risk of oil drips and spills. This makes for a safer and cleaner work environment.

Simple

The plugs are very easy to use and make maintenance simpler for you and your team.
